ARK PERFORMANCE VELOSTER ALPINE EDITION

SEMA 2012

ARK PERFORMANCE INC.

ARK Performance Inc. is a leader in providing superior aftermarket solutions for a variety of vehicles. Showcasing its excellence through product demonstrations, ARK Performance was founded fifteen years ago, and is now one of the largest manufacturing facilities in the Republic of Korea. ARK's primary objectives are to produce superior quality OEM and aftermarket automotive parts, while developing applications to contribute to the advancement of the automotive community.

ARK has steadily achieved an increased market share and has broadened its product line into performance exhaust systems, suspension, and CNC machined products that are currently being distributed to North America, the Middle East, and Asia. ARK Performance has received high marks for quality manufacturing, which is demonstrated by its ISO9001 and QS9000 certifications. This is the result of using the latest cutting-edge technology, and ultimately producing superior products. As ARK's slogan suggests, the quality of its products directly contributes to the overall quality of performance.
