Hyundai's high performance N brand was developed to make the driver's heart beat faster whenever they're behind the wheel. Instead of focusing on outright performance numbers, Hyundai chose to emphasize the N driver's heartbeats per minute (BPM), rather than revs per minute (RPM). With fun-to-drive character as a top priority, Veloster N has been developed to deliver thrilling cornering ability

coupled with everyday sports car drivability.

Building on top of the already performance-focused Veloster Turbo, the Veloster N adds a comprehensive degree of exterior, interior and mechanical differentiation. The 2.0L Turbocharged engine puts out up to 275 horsepower and 260 lb.-ft. of torque. This power is nothing without control and this is where Veloster N shines. All the chassis hardware upgrades and countless hours of tuning provide a driving experience that has already drawn unanimous praise from top-tier media outlets on the demanding Nürburgring in Germany. That driving experience is further enhanced with an exhilarating engine over-run exhaust crackle during spirited-driving and tip-out or when rowing the precise shifter and executing upshifts and rev-matched downshifts. Veloster N takes the Veloster name to an all-new level of performance and establishes the N brand in a way that will impress even the most hardcore driving enthusiasts.
